

Telcordia®

Numbering Policy, Planning & Administration Services

001

Create forward-looking number policies and plans

002

Optimize number resources nationwide

003

Establish an efficient, equitable administration center

► Some of the toughest responsibilities facing regulators in emerging telecom markets involve modernizing national numbering policies, numbering plans, and dialing plans. Although mandates and market conditions vary, every country must establish a numbering policy that provides a legal, legislative, and regulatory basis for competition. Then, it must articulate numbering and dialing schemes, services, technologies, and billing and tariff methods that support its chosen numbering policy. And it must also establish a fair, neutral office for numbering administration.

There is no organization better prepared to guide regulatory bodies through this highly complex process than Telcordia. We have a systematic approach, global regulatory specialists, and superior numbering databases to support you through any or all phases of numbering planning and implementation.

EMBRACE AN INNOVATIVE APPROACH

We are trusted advisors to nations around the globe because we stand with our clients to help ensure that the policies, plans, and processes we recommend deliver the results that clients expect.

Numbering Policy and Plan Development

We work with you to develop policies that allow competing service providers to support geographic and nongeographic applications, wireline and mobile services, and any special or abbreviated numbering or dialing formats. We then examine existing numbering allocations and assignments, so we can help you create forward-looking numbering and dialing plans that achieve number resource optimization and include identification features for service types, geographic locations, and service providers.

Numbering Plan Administration

We offer hands-on assistance through every step involved in establishing a numbering resource administrative unit. These steps include: drafting rules for number administration pursuant to regulatory directives, identifying necessary unit functions, designing procedures for carrying out those functions, implementing the unit, training personnel, and facilitating the transition to the numbering administrator so that the assignment of numbering resources can be carried out efficiently and equitably.

Interface with Service Providers

Drafting rules and plans is only part of the regulatory challenge. Successful market liberalization also requires clear, persuasive communication with service providers to achieve compliance. Our specialists can work with service providers to promote broad-based understanding of the new regulatory framework, and help to ensure that they have the functionality and capacity to support the new directives.

TRANSFORM YOUR CHALLENGES INTO BUSINESS BENEFITS

Telcordia support in meeting these national challenges can significantly improve your ability to:

- Achieve broad-based compliance with numbering and dialing directives
- Minimize implementation and administrative costs
- Avoid service disruptions during the modernization process
- Accelerate your nation's transition to an advanced telecom infrastructure.

• TELCORDIA NUMBER PORTABILITY SOLUTIONS

- Telcordia is the leading global supplier of number portability solutions, with complementary skills in number portability consulting services, software development, and managed solutions. Telcordia number portability offers can help you reduce the time and costs of introducing and managing number portability, facilitate on-time compliance with numbering mandates and directives, and realize significant competitive benefits.
